

Lupromax Oil Conference 2015 @ Mexico, Cancun

Expanding Dialogues

Cancun, Mexico – The second sitting of the Lupromax Oil Conference saw another strong showing, with delegates from different industries around the world convening from 16 – 18 November at the scenic Secrets the Vine Resort. Attendees from North America, Asia-Pacific and Latin America gathered to discuss and gain deeper insights into corrosion and lubrication technology, where industry leaders shared on the sustainable development of corrosion and heat-activated technology, focusing on the relevance of Lupromax and Vapro's roles in industry. This year's Conference brought more in-depth dialogues to the table with Lupromax being the main agenda for Day 1, and Vapro as the theme for Day 2. The Conference featured 19 speaker sessions and 4 keynote presentations, covering a variety of topics

including current and projected applications of bio-lubricants, the mechanism of world-record breaking Lupromax EA, corrosion technology and Vapro VCI's systemic relevance, and future industry directions. It also showcased the dynamics of market and industry developments that are critical knowledge in this high-growth area.

Lupromax & Vapro International Conference

“The Lupromax/Vapro International Conference continues to bring our attendees high quality discussion, and a good balance between industry needs and the latest innovations. We expanded the dialogue this year to include Vapro VCI and Molecular Surface Technology, and how its top-notch performance find applications across multiple industries,” said Dr Nelson Cheng, Conference Chairman and CEO of Magna Group.

The focus of the annual Lupromax/Vapro International Conference will be on innovations and technical applications, case studies, current practices as well as future growth opportunities, and the mechanics of corrosion and nano-technologies forecasted for critical growth.

“Combined with recognised speakers and substantive content, future installations of the Conference will continue to provide effective industry insights, with knowledge that is useful to everyone who attends, from CEOs to professors”, Dr Cheng said.

Upcoming Conference 2016, Seoul

Join us for Lupromax/Vapro International Conference 2016. Lupromax/Vapro International Conference 2016 will give you access to the latest and newest applications on cutting-edge technology, up-to-date technical information and valuable networking opportunities. The international Conference will benefit professionals from the biochemical, corrosion, lubricant, chemical manufacturing, defence, academic and related industries. The diverse backgrounds and expertise of the speakers will bring you better understanding and appreciation of innovation in industry.

Join us in October 2016 in Seoul, Korea for Lupromax/Vapro International Conference 2016.

Conference dates and other details will be advised in due course.
